

2013 TWENTY-FOURTH ANNUAL PROFESSIONAL SEMINAR VIDEO PRESENTATIONS

Many of the presentations given at this seminar were preserved as video files. To view these presentations, click on the links in the Details section below.

50 Ways to Leave Your Body (Diane Waybright) (4:09)

At the Monroe Institute's 2013 Professional Seminar Diane Waybright entertained the crowd of consciousness explorers with a heartfelt and comical rendition of "50 Ways to Leave Your Body." Lyrics by Franceen King and Scott Taylor.

Robert Emmett Monroe Remembers Bob Monroe (8:41)

Author Robert Emmett Monroe shares impressions and moments from his growing up years as Bob Monroe's nephew.

Psi Research at the MC Squared Program (Ross Dunseath) (57:17)

In 2011, TMI and the Division of Perceptual Studies (DOPS) at the University of Virginia began a collaboration in the study of psychokinesis (PK). At the DOPS neuroimaging lab, a central goal is to document psi performance and identify physiological conditions conducive to success. The MC2 program at TMI offers a tremendous resource for studying applied PK, allowing DOPS access to experimentation with talented and motivated groups and individuals. Using instrumentation constructed at DOPS for the sensing of PK events, three experimental sessions with MC2 groups have been run so far. The resulting data has been useful in the continuing development of new PK instrumentation and signal processing methods at DOPS. The results of the MC2 experimental sessions will be presented, with examples of the signals obtained and statistical results.

2013 TMI Professional Seminar Interviews

Several delegates to the 2013 Professional Seminar at The Monroe Institute in Virginia sat for interviews. They were asked three fundamental questions:

- 1) What excited you about The Monroe Institute?
- 2) What motivates you to do the work you do with TMI?
- 3) What do you see in the future for The Monroe Institute?

Andrea Berger (6:11)

Andrea Berger, international TMI Residential facilitator, Outreach facilitator, Professional Division member and president of Consciousness Evolution, talked about her service and relationship to The Institute.

Barbara Bullard (4:00)

Barbara Bullard, professor of speech communication, specializes in the effects of audio stimulation on brain function in learning, and sees the Monroe technologies as the most

innovative tools out there for supporting super learning. She discussed the impetus of her twenty-five-year membership in the Professional Division of The Monroe Institute.

Diane Waybright (2:41)

James Lane, PhD (1:43)

James Lane, PhD, research director at The Monroe Institute, addressed TMI's role as a research and educational organization now and moving forward. Fundamentally, the development, research, and application of Monroe audio technologies aim to improve the quality of life at a global level.

Jose Sanchez Garcia (3:22)

Joseph Felser (2:47)

Luigi Sciambarella (3:59)

Nick Ross (9:09)

Phillip Davidson (2:37)

Stefano Roverso (2:40)

Thomas Hasenberger (9:21)
